Professional Summary

Security Engineer specializing in penetration testing, vulnerability research, and security automation across web applications, APIs, networks, Android, and Active Directory environments. Identified and reported 180+ potential security vulnerabilities through HackerOne, Bugcrowd, and RDP programs. Active CTF player with hands-on experience in offensive security, red teaming concepts.

Technical Skills

Languages: Python, Bash, JavaScript, C, SQL

Security Tools: Burp Suite, OWASP ZAP, Nmap, Metasploit, SQLMap, Wireshark, Nikto, Postman

Domains: Web Application Security, API Security, Network Security, Mobile Security (Android)

Frameworks & Standards: OWASP Top 10, OWASP Mobile Top 10, CVSS v3.1, PTES, Secure SDLC

Technologies: Linux, Docker, Git, CI/CD Security, SQLite, Hexnode MDM

Professional Experience

Cybersecurity Engineer — Talrop

Jan 2025 – Apr 2026

- Performed VAPT on web applications, REST APIs, Android apps, and internal networks, identified vulnerabilities aligned with OWASP Top 10 and CVSS v3.1.
- Delivered remediation reports with risk ratings, reproduction steps, and mitigation recommendations for development and infrastructure teams.
- Managed endpoint security policies using Hexnode MDM to enforce compliance and maintain organizational asset visibility.

Full-Stack Developer Intern — Talrop

May 2024 – Dec 2024

- Developed and deployed web applications using React, Django, and RESTful APIs, implementing user authentication, role-based access control, and form validation following secure coding guidelines.
- Collaborated with cross-functional teams to debug production issues, optimize backend performance, and deliver feature releases on schedule within agile sprints.

Projects

Git-Hunter

Python, AsyncIO, SQLite, TruffleHog

- Built a GitHub secret reconnaissance engine with TruffleHog integration, regex-based detection, credential validation, and stealth scanning features.
- Developed a resumable async pipeline with SQLite persistence optimized for scanning 1,000+ repositories.

CrawlX

Bash, Python, OSINT API Integration

- Developed an OSINT reconnaissance framework integrating 15+ APIs for URL discovery, subdomain enumeration, and attack surface mapping.
- Implemented multi-threaded crawling, rate-limiting, and filtering mechanisms enabling 10K+ URL discovery per domain.

Certifications

Certified Red Team Analyst (CRTA) — CyberWarfare Labs

Certified AppSec Practitioner (CAP) — The SecOps Group

API Penetration Testing — APIsec University

Education

Scad College of Engineering and Technology

2020 – 2024

B.E. Computer Science and Engineering – CGPA: 7.8/10

Tirunelveli, Tamil Nadu
