Professional Summary

Security Engineer specializing in penetration testing, vulnerability research, and security automation across web applications, APIs, networks, Android, and Active Directory environments. Identified and responsibly disclosed 180+ security vulnerabilities through bug bounty and responsible disclosure programs. Active CTF player with hands-on experience in offensive security and red teaming concepts.

Technical Skills

Security: Web Application Security, API Security, Network Security, Mobile Security (Android)

Security Tools: Burp Suite, OWASP ZAP, Nmap, Metasploit, SQLMap, JADX, MobSF, Apktool

Programming: Python, Bash, JavaScript, C, SQL

Technologies: Linux, Git, Active Directory, Hexnode MDM

Professional Experience

Cybersecurity Engineer — Talrop

Jan 2025 – Apr 2026

- Conducted VAPT across web applications, APIs, Android applications, and internal networks, identifying vulnerabilities including IDOR/BOLA, authentication bypasses, broken access control, injection vulnerabilities, and security misconfigurations.
- Produced technical security reports containing reproducible PoCs, severity assessments, business impact, and remediation guidance for development and infrastructure teams.
- Managed endpoint security policies using Hexnode MDM to enforce compliance and maintain organizational asset visibility.

Full-Stack Developer Intern — Talrop

May 2024 – Dec 2024

- Developed and deployed React/Django web applications and REST APIs, implementing authentication, role-based access control, input validation, and secure coding practices.
- Collaborated with cross-functional teams to debug production issues, optimize backend performance, and deliver feature releases on schedule within agile sprints.

Projects

Git-Hunter

Python, AsyncIO, SQLite, TruffleHog

- Built a GitHub secret reconnaissance engine with TruffleHog integration, regex-based detection, credential validation, and scanning features.
- Developed a resumable asynchronous pipeline with SQLite persistence optimized for scanning 1,000+ repositories.

CrawlX

Bash, Python, OSINT API Integration

- Developed an OSINT reconnaissance framework integrating 15+ APIs for URL discovery, subdomain enumeration, and attack surface mapping.
- Implemented multi-threaded crawling, rate-limiting, and filtering mechanisms enabling 10K+ URL discovery per domain.

Certifications

Certified Red Team Analyst (CRTA) — CyberWarfare Labs

Certified AppSec Practitioner (CAP) — The SecOps Group

API Penetration Testing — APIsec University

Education

Scad College of Engineering and Technology

B.E. Computer Science and Engineering

2020 – 2024

Tirunelveli, Tamil Nadu
